Experience

Highleap Media June 2025 – August 2025
Full Stack Web Developer (Remote) *Ranchi, Jharkhand, India*

- Developed product catalog and inventory pages for an **electronics dealership platform** using **React.js** and **Node.js**, enhancing user experience and engagement.
- Designed and implemented **RESTful APIs** for product search, filtering, and order management, collaborating with a team of 4-5 engineers to streamline processes.
- Optimized **MongoDB** queries through indexing and projection, achieving a 30% improvement in page load time.
- Contributed to **CI/CD** pipelines using **GitHub Actions** within an **Agile** sprint-based workflow, improving deployment efficiency.

a1 AI May 2023 – May 2024
AI/ML Intern (Remote) *Chesterfield, Missouri, USA*

- Developed **Python** scripts for preprocessing and validating structured CSV datasets, enhancing data quality for AI pipeline inputs.
- Automated ETL tasks, reducing manual processing effort by 40%, which increased operational efficiency.
- Assisted in integrating **OpenAI API** and prompt engineering workflows for internal LLM-based tools, improving tool functionality.
- Gained practical experience with **RAG** pipelines and vector databases, including **ChromaDB** and **FAISS**, enhancing AI capabilities.

Projects

DevOps Failure Analysis Platform with RAG
FastAPI · React · ChromaDB · Gemini API · Docker · RAG (GitHub) (Live Site)

- Built a **full-stack** AIOps platform using **FastAPI** and **React** that processes CI/CD failure logs via **GitHub Actions** integration, utilizing a **RAG** pipeline for incident retrieval and analysis.
- Designed a resilient system with **Docker** containerization and persistent storage for incident history, ensuring reliability and scalability.

AI Mock Interview
Next.js 14 · Clerk · PostgreSQL · Gemini AI · Drizzle ORM (GitHub) (Live Site)

- Architected a browser-based AI mock interview platform utilizing **Gemini AI for dynamic question generation** tailored to user profiles, enhancing interview preparation.
- Integrated a **real-time speech-to-text pipeline** using the Web Speech API, providing live transcription and feedback for improved user experience.

Skills

Expertise: Full-Stack Developer with strong experience in AI-powered applications and cloud deployment.

Languages: C, C++, Python, JavaScript, TypeScript, SQL, HTML, CSS

Frameworks Libraries: React, Node.js, Express.js, Next.js, FastAPI, LangGraph, Tailwind CSS

AI GenAI: LLMs, RAG Pipelines, Prompt Engineering, Vector Databases (ChromaDB, FAISS), OpenCV

Developer Tools: Git, GitHub, Visual Studio Code, Postman

Cloud DevOps: AWS, Docker, CI/CD, Cloud Build, Cloud Run

Databases: MongoDB, PostgreSQL, MySQL, Firebase

Certifications & Achievements

- Top 800 Finalist (out of **31,000+** teams) at **Meta PyTorch OpenEnv Hackathon** for developing an agentic AI system for network incident triage and root cause analysis. (Link)

Education

Thapar Institute of Engineering and Technology Expected Graduation: 2027
Bachelor of Engineering in Computer Science
